

MITESH PATIL

Senior Integration Engineer • API-Led Integration & Middleware • Salesforce & MuleSoft Ecosystem • CRM (Siebel → Salesforce)

patil.mitesh222@gmail.com • +91 9638338975 • Pune, Maharashtra, India

PROFESSIONAL SUMMARY

Senior Integration Engineer with 5+ years across enterprise API and middleware platforms, backed by a strong CRM foundation (5+ years Siebel CRM and Salesforce Certified Administrator). Deep hands-on experience in **API-led integration** — API gateways, layered request and transformation services (System / Process / Experience-style patterns), OAuth / JWT / mTLS security, and bidirectional **JSON⇌XML transformation** — an architecture that maps directly to **MuleSoft Anypoint**. Proven ownership of full API lifecycle management, CI/CD automation, and production incident resolution at scale. Now focused on the **Salesforce & MuleSoft ecosystem**, building toward an **Integration Architect** track (MuleSoft Certified Developer – Level 1 in progress).

CORE COMPETENCIES

API-Led Integration & Gateways	API-led connectivity (System / Process / Experience patterns), API gateways — Okapi Gateway (OGW), Apigee; WSO2 Micro Integrator; REST / SOAP, inbound/outbound web services, microservices
Integration & Transformation	Bidirectional JSON⇌XML mediation, XSLT (DataWeave-equivalent), payload/header mapping, data transformation; Siebel EAI, Data Maps, Dispatch Services, EIM
Salesforce & CRM	Salesforce Certified Administrator — Sales Cloud, Service Cloud, Flow automation, REST/SOAP API integration, custom objects, reports & dashboards, Trailhead (51,000+ pts); Siebel CRM (IP8 / IP20 / IP22) — configuration, workflows, e-scripting, Open UI
Auth & Security	Entra (EntraID) OAuth, JWT, OMI CLI, App-ID validation, rate limiting, mTLS, SSL / certificate management
Cloud & DevOps	AWS, Microsoft Azure (AZ-900), GitLab CI/CD, Bamboo, Nexus, New Relic, firewall configuration
Languages & Data	JavaScript, Java, jQuery, HTML5/CSS3, SQL, XSLT, Oracle SQL, Predictive Modelling
Emerging Tech	GenAI / Smart Bots, Business Intelligence, Predictive Analytics

WORK EXPERIENCE

Senior Software Engineer — Integration & API

Aug 2024 – Present

Cognizant • Pune, India

Client: Telstra — MAXIM API platform (Apigee → OGW / OKAPI Evolve migration)

API Gateway & Lifecycle Management (API-Led Connectivity)

- Led the end-to-end migration of the **MAXIM API suite — 12 inbound APIs** — from legacy **Apigee** to **Okapi Gateway (OGW / OKAPI Evolve)** on the **MaaS platform**, delivering all APIs across NonProd and PROD.
- Owned the full API lifecycle on OGW via the **OMI CLI/API** — tenant & consumer administration, proxy/target/product configuration with tag-matching finders, SSL/mTLS certificate management, and multi-environment deployments.
- **Onboarded ~30 consumer applications** (Entra client-id registration + product/finder binding) and drove per-consumer cutover and the **Apigee decommissioning** plan (gated on live traffic), coordinating with the MaaS/OKAPI platform team.
- Orchestrated firewall and cross-system security requests for zero-downtime integrations; used **New Relic** and gateway analytics for deep root-cause analysis of gateway and Siebel incidents (Entra App-ID 401s, nginx upstream-buffer, Siebel SBL-EAI faults).
- Designed and built the **OGW UI** — a web front-end over the OMI/OGW APIs to **visualise and manage gateway resources** (tenants, consumers, proxies, products) and streamline consumer onboarding and operational monitoring.

API-Led Integration, Transformation & Authentication

- Designed and built two **WSO2 Micro Integrator** services — **Rate Limiting (RL)** and **Payload Transformation (PT)** — following an **API-led connectivity** pattern (a process/transformation tier between JSON experience-layer consumers and the XML **Siebel** system layer): bidirectional **JSON $\rightleftharpoons$ XML** mediation via **XSLT (DataWeave-equivalent)** with header mapping.
- Migrated authentication from Apigee tokens to **Entra (EntraID) OAuth** — built a **JWT-decode mediator**, per-environment token validation, and per-consumer **App-ID allow-listing + rate limiting** in the RL layer (with the MaaS platform team).

CI/CD, Reconciliation & Handover

- Built automated build/deploy pipelines: **WSO2 Integration Studio** → **GitLab** → **Bamboo** → **MaaS Platform** (environment variables from Nexus + MaaS).
- Reconciled **Apigee-vs-OGW response-format** differences (numeric/null serialization) and recommended a PT-side normalisation; authored full **OGW documentation (Confluence)**, runbooks and a consumer master, and led the team **knowledge transfer & transition**.

Innovation & Cloud Projects

- **Siebel CRM Smart Bot (Internal Hackathon)**: Designed and built a **GenAI-powered conversational bot** integrated with Siebel workflows and EAI to automate routine business processes and agent queries — reducing manual touchpoints and handling time.
- **EMPAI360 – Customer Churn Prediction Platform**: Built and supported **cloud integration services and API connectivity on AWS** feeding a **predictive-analytics platform** that scores customer churn risk to drive data-driven retention — integrating data pipelines and model-serving endpoints.

Salesforce — Hands-On Projects & Ecosystem (Certified Administrator | Trailhead 51,000+ pts)

- **Lead & Opportunity Management (Sales Cloud) — Personal Project**: Independently configured a Salesforce Sales Cloud developer org from the ground up; designed custom objects, page layouts, validation rules and record types modelled on enterprise CRM patterns from Siebel experience; implemented Flow-based automation for lead assignment and follow-up.

- **Siebel-to-Salesforce Integration (Self-Study):** Prototyped a REST/SOAP API integration layer connecting Siebel EAI web services with Salesforce external objects; applied hands-on knowledge of Siebel Data Maps, LOVs and Dispatch Services to field-level mapping and data transformation.
- **Service Case Automation (Service Cloud) — Trailhead Practice:** Completed hands-on modules covering Service Cloud case management, automated escalation workflows, SLA tracking and dashboards; drew on Siebel Business Service / Business Component patterns.

Package Consultant — Siebel CRM

IBM • Pune, India

Apr 2023 – Jul 2024

- Translated complex business and technical requirements into structured Siebel upgrade strategies, aligned with enterprise roadmaps.
- Evaluated legacy Siebel code, scripts and configurations to identify and remediate components for seamless version compatibility.
- Delivered Siebel IP22 migration projects end-to-end, covering EAI inbound/outbound web services, XSLT transformations, Data Maps, Dispatch Services and e-Scripting.
- Configured and optimised Siebel workflows, business rules and core components using EIM processes to meet upgraded specifications.

Software Engineer — Siebel CRM

Tech Mahindra • Pune, India

Apr 2021 – Mar 2023

- Core Siebel CRM developer for large-scale Telecom domain projects spanning IP8, IP20 and Siebel Open UI.
- Delivered end-to-end development across Siebel Configuration, EAI, Scripting, Workflows and EIM.
- Diagnosed and resolved complex environment issues using advanced debugging techniques, maintaining high system uptime.

EDUCATION

B.Tech — Electronics & Telecommunication Engineering (E&TC)

[College name • Year]

CERTIFICATIONS

MuleSoft Certified Developer – Level 1 (Mule 4) — in progress	2026
Salesforce Certified Administrator	Mar 2024
Oracle Machine Learning using Autonomous Database – Certified Associate	Nov 2023
Oracle Certified Foundations Associate	Nov 2023
Siebel CRM EAI, Web Services, Integration & Automation Workflow	Feb 2023
The Complete Oracle SQL Bootcamp	Apr 2022
AZ-900: Microsoft Azure Fundamentals	Aug 2021

KEY ACHIEVEMENTS

Design Mentor, AICTE Smart India Hackathon (SIH)

2022 – 2026

Served consecutively as Design Mentor across five editions — onsite at IIT Guwahati (2025), NIE Mysuru (2024, 2023), GBU Noida (2022) and online (2026) — evaluating and guiding hundreds of student innovation teams nationally.

National Media Recognition

2019

Featured by YourStory and published across multiple national newspapers for the innovative Smart Safety Helmet engineering project.

Grand Finalist – 2nd Runner-Up, SIH 2019 (Hardware Edition)

2019

Finished in the top 3 teams nationwide at the Smart India Hackathon Grand Finale.
